

MICHIGAN PRODUCTION MACHINING, INC.

QUALITY POLICY

MPM'S Quality Management System is guided by international standards, core tools and customer specific requirements. Our system is based on a commitment from management to provide a unified direction to ensure customer satisfaction through "First Time Quality" delivered "On Time". This is accomplished with our focus on and continuous analysis of key processes, employee involvement, interested parties and opportunities for improvement all functioning as one system. In addition, risk identification and mitigation are utilized to ensure preventative controls allow us to meet our customers' expectations.

Kevin West
President

This policy is communicated to all employees and is available to the public through selected media.
